

Message to the Congress on Continuation of the National Emergency With Respect to Weapons-Usable Fissile Material in the Russian Federation

June 19, 2007

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice to the *Federal Register* for publication, stating that the emergency declared with respect to the accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation is to continue beyond June 21, 2007.

It remains a major national security goal of the United States to ensure that fissile material removed from Russian nuclear weapons pursuant to various arms control and disarmament agreements is dedicated to peaceful uses, subject to transparency measures, and protected from diversion to activities of proliferation concern. The accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation continues to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. For this reason, I have determined that it is necessary to continue the national emergency declared with respect to the accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation and maintain in force these emergency authorities to respond to this threat.

George W. Bush

The White House,
June 19, 2007.

NOTE: This message was released by the Office of the Press Secretary on June 20.

Remarks on Returning Without Approval to the Senate the “Stem Cell Research Enhancement Act of 2007”

June 20, 2007

Welcome. I'm glad you're here. America is a nation that leads the world in science and technology. Our innovative spirit is making possible incredible advances in medicine that could save lives and cure diseases. America is also a nation founded on the principle that all human life is sacred, and our conscience calls us to pursue the possibilities of science in a manner that respects human dignity and upholds our moral values.

I appreciate the fact that we're joined by a lot of folks who share the deep desire to advance science and, at the same time, uphold our moral values. I appreciate the fact that Mike Leavitt is here, Secretary of the Department of Health and Human Services. I want to thank the Members of the United States Congress and Senate who have joined us. I thank you for taking your time to be here on this important announcement today.

I'm joined on stage by two good docs, really smart, capable people: Dr. Bill Hurlbut, professor of Stanford University Medical Center; Dr. Don Landry, professor at Columbia University Department of Medicine—actually, he's the chairman of the department. The reason they're here is, these are brilliant biologists who are seeking new ways to develop stem cell lines without violating human life. And these are smart folks, and I cannot thank them enough for coming to the Oval Office to share with me their wisdom and their vision.

I'm also up here with Carol Franz. She has whipped cancer twice by using adult stem cells. In other words, adult stem cells have saved her life. She's a determined woman who believes strongly that there are different alternatives available to use stem cells other than those which are created as the result of destruction of human life.

And finally, I'm up here with the McNamara family; Kaitlyne is with us. I'm going to talk about her in a second.

I do want to thank the other stem cell patients and researchers and advocates who are here with us today. If you're not in any of
